

# PDF Forms Designer

Passport Software, Inc.

The PDF Forms Designer, as developed by FyTek, Inc. as PDF Report Writer, provides a method of combining your old PBS format with a new modernized look that is highly customizable. This document explains the advantages of using PDF Forms Designer over the previous method.

## Advantages

There are many advantages to using the PDF Report Writer technology for forms printing over the older method. Here are a few:

*When printing:*

1. No alignment necessary.
2. You can use almost any laser or multi-purpose printer – no PCL codes are required.
3. All forms have a generated PDF file suitable for emailing.
4. For printing, use either –PDFP-, –PDF- or Windows printer. –PDFP- and Windows printer prints the form with data and produces a PDF file suitable for emailing. Using –PDF- only produces a PDF file suitable for emailing.
5. The size of each PDF file is smaller.

*For both field labels and field data you may:*

6. Change the font type, size, color and alignment per field as needed.
7. Change the text background color.
8. Add borders of any size around text using any color.
9. Use a bar code to print the order number and item number.
10. Uses the standard PBS forms setup to add and remove fields.

*For the PDF Win-forms design:*

11. You can add vertical and horizontal lines with different colors and thicknesses.
12. You can add boxes around text.
13. You can add multiple graphics per form and place them anywhere on the page.
14. You may add text and 'clickable' links to the PDF file for web addresses or email addresses.

Initially this will be released for Accounts Receivable, Order Entry and Point of Sale. Following that this printing will be available for Customer Orders and Purchase Order.

## Example of the previous format on the left compared to a PDF Forms Designer format:
